

# KITCHEN

2506 SYLVAN ROAD

## PROJECT DESCRIPTION

The view from the French doors in the den into the garden is lovely. Unfortunately the same view from the kitchen was completely blocked by cabinetry. By removing a wall and flipping the kitchen with the eating area, the beautiful garden is visible everywhere. The small cozy kitchen with its added beams, glassed in bar area and large storage hutch complete the English cottage feel of the house. The warm cherry finished cabinets, beautiful granite and unique tile backsplash enhance the ambiance. With everything close at hand this kitchen is a perfect example of the concept that small kitchens can often offer more functionality than larger kitchens.
