

# COMPLETE RENOVATION

4600 GRENDL ROAD

## PROJECT DESCRIPTION

The overall objective of the project was to update and open the floor plan of this 1960's home to make it more functional. Walls were removed to open the front living room to the former den and give a wide open living area with views into the dining and kitchen, which was updated with custom cabinets, appliances, granite and lighting. A space at one end of the house was converted into a master suite with large bath, large walk-in closet and a hallway to a beautiful outdoor living space.

## REMODELER

**Builders MD**

**David Flanders and Mark Disney**
